

INSAF DELEND

insaf.del3@gmail.com | Rouen, France | linkedin.com/in/insaf-delenda | +33 759 245 654

Research Interests: Medical Image Analysis • Computer Vision • Deep Learning • Machine Learning • 3D Vision

EDUCATION

B.Sc. Computer Science, Data Science Track 2025 – 2026

University of Rouen Normandie, France

- Relevant coursework: Signal & Image Analysis, Graph Algorithms, Bayesian Decision Theory, OOP

Preparatory Cycle + 1st Year AI Engineering 2022 – 2025

National higher school of Artificial Intelligence (ENSIA), Algeria

- Relevant coursework: Machine Learning, Data Mining, Time Series, Software Engineering, Data Structures

RESEARCH & PROFESSIONAL EXPERIENCE

Research Intern : Medical Image Segmentation May – Jun 2026

LITIS Laboratory, University of Rouen Normandie, France

- Developed deep learning models for cardiac event detection through segmentation of NIfTI medical images
- Managed preprocessing pipeline on anonymized patient data under strict ethical and GDPR-compliant protocol
- Evaluated model performance using Dice score and IoU metrics; iterated on architecture to improve results

Computer Vision & Machine Learning Intern Oct 2025

SARL Rakib, Algeria

- Engineered a confidential Computer Vision solution for security system automation using Python and OpenCv

Sales Analyst & Revenue Forecasting Intern Oct 2024

Cimenterie de Meftah, Algeria

- Designed time series models (ARIMA, LSTM) to forecast quarterly revenue and support business decisions

ACADEMIC PROJECTS

Chest X-Ray Classification : Pneumonia Detection Oct 2025 – Mar 2026

- 3-class classification of pulmonary radiographs using Vision Transformers; trained and evaluated on public anonymized datasets

Multi-Factor Authentication System, Project Lead Apr 2025

- Led the design and implementation of an AI-powered multi-factor authentication system combining voice biometric verification and machine learning, achieving 94% recognition accuracy.

NLP Developer : CV/Job Matching System Feb – Apr 2025

Mobilis, National Telecom Operator, Algeria

- Built an end-to-end NLP pipeline to match CVs with job offers, deployed with a full web interface

Ambulance Routing Optimization Nov 2024

- Full-stack application using graph-based AI algorithms to minimize emergency vehicle response times

TECHNICAL SKILLS

Languages: Python, R, Java, C++, Dart/Flutter

AI / ML: Deep Learning, Computer Vision, Segmentation, Classification, Time Series Forecasting

Frameworks and Libraries: PyTorch, TensorFlow, Scikit-learn, HuggingFace Transformers, OpenCV, nibabel

Data and Scientific Computing: NumPy, Pandas, SciPy, Matplotlib, Seaborn

Tools: GitHub, Jupyter, Google Colab, Kaggle

Methods: Agile / Scrum, Project Management, Technical Documentation

AWARDS & HONORS

- MINMACS Excellence Scholarship, University of Rouen Normandie, Admitted 2026
- 3rd Prize, National Startup Competition, Ministry of Startups, Algeria ,Sep 2024

LANGUAGES

French (Fluent) | English (Fluent) | Arabic (Native)
